

# Karni Healthcare Technology Solutions

## Karni Health Tech Business Objective

Karni Healthcare Technology Solutions helps Australian healthcare businesses to effectively develop and manage their customised healthcare technology solutions with artificial intelligence offerings by leveraging and utilising Armenia's software and technology capabilities, programming knowledge and talented tech workforce and health care professionals

### Australian healthcare and the requirement to innovate.

Australian healthcare which is currently valued at \$180 billion, with over 150 million Medicare visits annually, 11 million hospital admissions annually, 250,000 seniors in aged care and with a significant growth in non-communicable diseases, such as cardiovascular, diabetes and oncology and requires clinical and technology developments to meet these ongoing demands.

The questions beckons, who can help Australian healthcare businesses with their healthcare technology requirements and artificial intelligence platforms and who has demonstrated significant achievements within the technology industry.

### Armenia the tech minnow can help with our going heath tech needs.

The answer is a little minnow known as Armenia, straddled in the epicentre of Eurasia, who over the last two decades has made significant investments in its engineering, scientific and technology capabilities and workforce.

Armenia's diverse and dynamic technology space has been empowered by its national STEM universities, 15,000 plus technology employees, and 800 plus technology companies who are highly regarded in computer science and engineering, software design and development, industrial electronics and chip design, e-commerce and mobile applications, cybersecurity and artificial intelligence.

### Who can help with linking and leveraging into the Armenian technology space.

The answer is Karni Healthcare Technology Solutions, who has two operational offices in Sydney and Yerevan, its principals and team are highly experienced and skilled in technology and software development and engineering, artificial intelligence, law and medical devices, and have worked across national borders.

## Karni Healthcare Technology Solutions can help

- Customised Healthcare Technology Solutions
- Artificial Intelligence & Health Tech
- Data Analytics & Healthcare Management
- Enterprise Resources Planning Software Solutions

# Karni Healthcare Technology Solutions

## 01. Communicate & Engage

Karni Health Tech will comprehensively communicate and engage with management to understand your healthcare technology requirements and pain points and collaboratively roadmap a customised and competitive health tech solution.

## 02. Software Engineering

Utilise our software engineering and developer team's superior coding skills, deep knowledge of programming languages and frameworks to design robust, scalable and secure health tech solutions.

## 03. Tech Solutions & Platforms

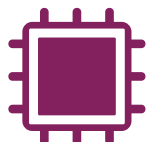

Ensure your healthcare business and our technology teams communicate effectively and utilise the appropriate software development tools to ensure health tech solutions and platforms are designed to specification and task milestones.

## 04. Leverage into our STEM Networks

Leverage into our extended healthcare, engineering and scientific networks to determine whether we can incorporate alternative technologies and healthcare concepts, to elevate your healthcare technologies to an optimum level.

## 05. Regulation Compliance

Utilise all applicable government research and development incentives and comply with all legal and intellectual property requirements and legislation in designing the required health tech solutions.

## 06. Quality Assurance

Quality assurance and testing performed at all relevant intervals to minimise any challenges, gain continuous feedback and improvements and ensure the healthcare technology solutions complies with our agreed health tech requirements.

## 07. Comprehensive User Training

Provide comprehensive user training and maintenance to your business and employees regarding the newly developed healthcare technology platforms and software and ensure a positive user experience.

## 08. Budget & Timely Completion

Finally, Karni Health Tech and its principals, will provide written project fee agreements and ensure all healthcare technology solutions are completed within budget and in a timely manner.
